

YNHH Laboratory Manual

Outreach

YNHH Laboratory Medicine offers, through its Outreach section, a valuable reference test resource for both community physicians and area hospitals. A wide variety of the most technically current testing is accessible to patients, not only in-house, but also as outpatients through their private physicians.

YNHH Laboratory Medicine also handles referrals for specialized tests from other hospitals, institutions and laboratories across the country. State of the art testing is offered in Flow Cytometry, Molecular Diagnostics, Special Hematology and Coagulation, Chemistry, Virology and Microbiology. Sophisticated Prenatal and Perinatal screening is also available.

Test results are available 24/7 via EPIC, a hospital web-based system offered to area physicians and hospitals. For more information on this service, please call (203) 688-4357.

Currently, there are 18 YNHH draw stations throughout Southern Connecticut to best serve patients (and their families) and their physicians. A complete listing of YNHH draw stations can be found at the following: <https://www.ynhh.org/services/laboratory-medicine.aspx>

Questions involving laboratory requisitions, specimen requirements and pickup, and other available laboratory services should be directed to our Customer Service Center at (203) 688-3670 or 1 (800) 305-3278.
